

In compliance with Article 54 Opioid Reduction Act, Braxton County Memorial Hospital offers patients the right to opt out of being prescribed an opioid medication by completing a Voluntary NonOpioid Advanced Directive. The form shall indicate to a health care practitioner that an individual may not be administered or offered a prescription or medication order for an opioid. The advanced directive will be filed in the individual's medical record and will be transferred with the individual from one practitioner to another or from this facility to another care facility in the event of an interfacility transport.

Patients may access to form by clicking on the link below. The Office of Drug Control Policy encourages patients to complete the form in consultation with their primary care provider or SUD treatment provider. However, consultation is not necessary to the validity of the form.

To view and/or print the Voluntary NonOpioid Advanced Directive please follow the provided link:
